PROFESSIONAL SUMMARY

Motivated Computer Engineering undergraduate with practical experience in backend development using Python, FastAPI, and PostgreSQL. Skilled in building RESTful APIs, managing structured data, and deploying applications using Docker. Currently expanding expertise in Django, Flask, and machine learning integration to develop scalable and efficient web solutions.

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL
- **Frameworks & Tools:** html, css, FastAPI, sqlalchemy, Docker, Git, GitHub
- **Databases:** PostgreSQL
- **Core Concepts:** RESTful APIs, CRUD Operations, Data Structures (Python)
- **Libraries:** NumPy, Pandas (basic)

PROJECTS

Smart Business Data Management Application

- Developed a backend application using FastAPI and PostgreSQL for efficient data management
- Implemented complete CRUD operations for structured record handling
- Designed RESTful APIs for seamless data interaction
- Containerized the application using Docker for portability and scalability
- Focused on modular design and maintainable code architecture

REST API Development Practice

- Built multiple API endpoints using FastAPI
- Implemented request validation and structured responses
- Gained hands-on experience in debugging and API optimization

MACHINE LEARNING EXPOSURE

- Basic understanding of data handling using NumPy and Pandas
- Familiar with fundamental ML concepts and workflows
- Actively learning to integrate machine learning models into backend systems

EDUCATION

Bachelor of Engineering in Computer Engineering

CMR University, Bangalore

Expected Graduation: 2029

STRENGTHS

- Strong analytical and problem-solving skills
- Quick learner with adaptability to new technologies
- Ability to work collaboratively in team environments
- Focused on writing clean, efficient, and scalable code

ADDITIONAL INFORMATION

- Actively practicing Data Structures and Algorithms in Python
- Interested in backend development and AI/ML integration
- Available for remote internship (immediate start)
